

REMARKS

In view of the Examiner's objections to the drawings, the figures have been amended to show a means for locking the ignition lock I so that, when the locking member 3 is pivoted into a position as shown in Fig. 3, the ignition K is retained in the ignition lock L – as described in the last par. of the description.

Claims 6, 9 and 10 have been amended by the Examiner so that the Examiner's objection to these claims should have been overcome and these claims should now also be in condition for allowance.

Reconsideration of these claims is respectfully requested and allowance of claims 1 and 3 - 10 is solicited.

Respectfully submitted,

Klaus J. Bach  
Reg. No. 26832  
Cust. No.: 27956
